IMPRESS®
system portfolio

Manage your instruments to help improve patient care

The *IMPRESS*® portfolio offers a full range of scalable, real-time and integrated instrument management solutions with extensive support. Using these solutions, you can manage your inventory, people and processes throughout the continuum of instrument management. The *IMPRESS* system can support your initiatives to:

- Enhance patient safety
- Reduce case delays
- Increase staff productivity
- Locate instruments and sets
- Limit immediate-use steam sterilization
- Control instrument spend
- Meet today's challenging industry standards

With more than 20 years of experience in instrument tracking, the V. Mueller® brand *IMPRESS* system is the name you can trust in the sterile processing department (SPD) and operating room (OR).
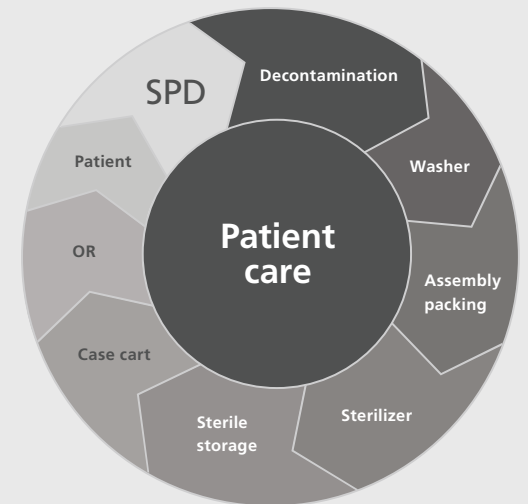

CareFusion

Flexible, scalable instrument inventory management

Offering varying levels of functionality to meet your unique needs, the *IMPRESS* portfolio includes three easy-to-use, flexible solutions ranging from a basic system to an advanced, fully integrated system. All solutions feature the same look and feel, touch-screen technology, option to be web hosted or server deployed and multi-entity functionality. With the *IMPRESS* portfolio, you can easily upgrade to a system with more robust functionality as your needs evolve.

Immediate-use steam sterilization			•
OR reporting			•

Track instruments throughout the continuum of instrument management

SPD — Decontamination, Washer, Assembly packing, Sterilizer, Sterile storage, Case cart, OR, Patient — Patient care

IMPRESS system services and support

- Instrument inventory/validation
- Data entry
- 24/7 phone support
- Dedicated implementation managers
- Comprehensive V. Mueller instrumentation offering

IMPRESS Countsheets system

IMPRESS Countsheets is the base-level offering of the *IMPRESS* portfolio. Through easy-to-use functionality, you can address your instrument management processes while managing information to drive operational efficiency.

IMPRESS Countsheets features

- Automated countsheet management
- Countsheet standardization
- Countsheet access
- Reporting
- More than 350,000 instrument images
- V. Mueller catalog
- Cross reference tool

IMPRESS Countsheets enables you to manage, standardize and access countsheets

IMPRESS Track system

In addition to providing all of the *IMPRESS* Countsheets capabilities, *IMPRESS* Track lets you easily track assets, manage sterilization and gain actionable intelligence for enhanced instrument management with robust functionality.

IMPRESS Track features

- Multi-entity management
- Inventory management
- Process alerts
- Washer in and out tracking
- On-screen assembly
- Critical item flagging
- Repair management
- Sterilization management
- Non-sterile warnings
- Case cart management
- Patient-level tracking
- Warranty tracking
- 100+ reports
- Supervisor control center

IMPRESS Track enables you to:

Proactively monitor and display SPD productivity for greater visibility.

View instrument and set images, indicate missing and damaged instruments, pull replacements from back wall inventory and pause the assembly process.

Identify and flag items that are continuously in short supply for ongoing priority processing.

Document sterilization and receive alerts when items are loaded into mismatched sterilizers and biological indicators need to be read.

IMPRESS Track system

IMPRESS Connect system

IMPRESS Connect offers the most advanced functionality in the *IMPRESS* portfolio, building on all of the *IMPRESS* Track capabilities. A fully interfaced and integrated open tracking solution that operates as a data and process repository, *IMPRESS* Connect enhances all sterile processing and distribution processes to help you optimize patient care.

IMPRESS Connect features

- OR interface
- Sterilizer interface
- RFID/RTLS connectivity
- Case cart management
- Loaner tracking
- Single instrument tracking
- Robust reporting

IMPRESS Connect enables you to:

Interface with any OR scheduling system to auto-prioritize inventory based on patient status.

Interface with any interface-capable sterilizer to automatically collect sterilizer load information.

Easily check loaner sets in and out for greater visibility and management, and group, track and report all inventory associated with or sent to a case.

Provide the OR team with visibility to missing and unused/unopened sets while promoting communication between the OR and SPD.

IMPRESS Connect system
