Assembly and disassembly of Switch-Blade® laparoscopic scissors

Snowden-Pencer® surgical instruments

Assembly

1. Remove tip from sterile packaging.
2. Ensure blades are closed and protective clear cap is on.
4. Thread the tip onto the shaft, turning clockwise, and tighten by hand.
5. Remove and save protective clear cap.
6. Open handle until audible “click” is heard.
7. Perform visual inspection of blades to confirm blades will move by opening and closing the handle and verifying the connection.

Disassembly

1. Close blades.
2. Replace protective clear cap on scissors.
3. Grasp the instrument shaft. Do not grasp the handle.
4. Unthread tip from shaft in a counterclockwise motion. Spread handle rings.
5. Pull tip off in straight motion from the shaft. Do not bend the tip down as this can damage the shaft of the instrument.
6. Discard scissor tip in accordance with hospital policy.
7. Open handle for visual inspection of actuating rod.
8. Ensure ball is not damaged.

Think Blue for ergonomics, versatility and durability.

Next generation Snowden-Pencer instruments all have ergonomic blue handles.
