1. Hold the bottle in an upright position.
2. Twist the applicator neck in the direction of the arrow until it stops.
3. Firmly push the applicator head down into the bottle until a snap is heard.
4. Invert bottle and gently squeeze to dispense solution.
5. Apply thin, even coat to operative site.
6. If applying prep to a tight area (e.g., neck, skin folds), insert prep towel underneath to absorb excess solution.
7. Remove any excess prep with absorbent towels or gauze.
8. Discard prep materials, including solution soaked materials.
9. Wait until prep is dry (3 minutes or more) on skin before draping or using ignition sources.
10. Remove with soap and water.

**Warnings**
Keep this and all drugs out of the reach of children. Store at room temperature. Avoid excessive heat (not to exceed 104°F/40°C). Protect from freezing. Not for use in the eyes, on open wounds, as a general skin cleanser, or for preparing mucous membranes. Do not use on iodine-sensitive patients. Do not use on children less than 2 months of age. Questions? Report serious side effects, call 1-800-525-6602 Mon. – Fri. 8 AM – 5 PM CST

Drug Facts (continued)

Warnings
For external use only.

Flammable, keep away from fire or flame. To reduce risk of fire, PREP CAREFULLY:
- Solution contains alcohol and gives off flammable vapors.
- Do not drip or use ignitible source (e.g., cautery, laser) until solution is completely dry (minimum of 3 minutes on hairless skin; up to 1 hour in hair).
- Avoid getting solution into hair areas. Wet hair is flammable. Hair may take up to 1 hour to dry.
- Do not allow solution to pool.
- Remove wet materials from prep area.

Do not use
- on children less than 2 months of age because of the potential for excessive skin irritation and increased drug absorption. Daily use of iodoform on newborn infants may increase blood iodine level.
- on iodine sensitive patients.
- on open skin wounds or as a general skin cleanser.
- in the eyes or for preparing mucous membranes.

When using this product use in well ventilated area.
Stop use and ask a doctor if irritation, sensitization, or allergic reaction occurs. These may be signs of a serious condition.

Directions
To reduce risk of fire the following strategies are recommended:
- At the end of prep, discard any portion of the solution which is not required to cover the prep area. It is not necessary to use the entire amount available.
- Use in a well ventilated area.
- Avoid getting solution into hair areas. Wet hair is flammable. Hair may take up to 1 hour to dry.

Drug Facts (continued)
- Do not allow solution to pool.
- Use proper towels to absorb solution, and then remove.
- Remove wet materials from prep area.
- Drape after solution is completely dry.
- Hold bottle in an upright position.
- Twist the applicator head in the direction of the arrow until it stops.
- Firmly push the applicator head down into the bottle until a snap is heard.
- Invert bottle and gently squeeze to dispense solution.
- Once applicator sponge has been primed with solution, it is not necessary to continue to squeeze the bottle.
- When applicable, press cotton-tipped swab securely against impregnated applicator head to wet, then clean umbilicus.
- Apply thin, even coat to operative site.
- If applying prep to a tight area (e.g., neck, skin folds), insert prep towels underneath to absorb excess solution.
- Remove any excess prep with absorbent towels or gauze.
- Discard prep materials, including solution-soaked materials.
- Wait until prep is dry (3 minutes or more) on skin before draping or using ignition sources.
- Remove with soap and water.

Other information
- Store at USP room temperature, 20-25°C (68-77°F).
- Avoid excessive heat (not to exceed 104°F/40°C).

Inactive ingredients
- Citric Acid, Glycerin, Hydroxypropylcellulose, Nonoxynol-10, Simethicone, Sodium Hydroxide, USP purified water.

Questions?
call: 1-800-523-0502 (M-F 8 AM-5 PM CST)

Patient Take Home Instructions

Your surgeon used Preveal Surgical Solution to prep your skin. Preveal is a fast-acting, broad-spectrum, persistent, antiseptic-containing preparation that significantly reduces the number of micro-organisms on intact skin. The prep will gradually wear off. If, however, early removal is desired:
- Remove with soap and water.

Report serious side effects, call:
1-800-523-0502 Mon.-Fri. 8 AM-5 PM CST.
