- BD Customer Service: 1-888-237-2762

### BD Standard Formulary

Wider array of specialized products that will continue to be available for unique customer needs.
Today’s Complex Clinical Landscape

Diagnostic testing has changed dramatically over the past 50 years. Despite increased testing complexity, the lab is still measured on quality results delivered on time. Consistent and reliable, BD has been and will continue to be your partner in preanalytical excellence.

Situation

THEN

All specimens were collected in hospital...
By medical technologists...
Hand carried to lab...
A limited number of test menus and instruments available...
Large volume of samples tested...
Results were a snapshot in time...
Test analytes were measured at $10^{13}$

NOW

Specimens are collected in and out of hospital...
Transported by pneumatic tube systems, air and couriers...
Ultra-low sample volumes...
Analytes are monitored over time...
Test sensitivity increasing to $10^{13}$
Frequent staff turnover...

RESULT OBTAINED

Solution

For half a century, BD - Inventor of the BD Vacutainer® System - has adapted to the ever-changing clinical landscape. Today, the BD Best Practice Formulary (BPF) integrates our medical expertise with clinical and regulatory guidelines, to create a superior specimen collection system that will:

- Optimize patient care
- Reduce purchasing and inventory costs
- Enhance product availability
- Standardize product usage across locations

RESULT OBTAINED

What is the BD Best Practice Formulary program?

The BD BPF is a group of products that reflect recommended best practice by current scientific, technical and medical communities. It was created to meet the needs of today’s complex diagnostic testing.

How was the Best Practice Formulary created?

BD created a BPF Team comprised of clinicians, medical technologists, diagnostic company specialists and regulatory experts.

The team researched the current clinical literature to determine the products and practices that provide superior results. These recommendations were validated by experts in the field, regulatory specialists, and diagnostic industry leaders.

The products chosen for the BD BPF are those you already know and trust. Through clinical studies and ongoing dialogue with its constituents, BD is committed to providing products with the quality and accuracy you’ve come to rely on.

What are the categories?

**BD Best Practice Formulary:**
Clinically proven products providing quality and cost effective solutions for today’s clinical practice.

**BD Standard Formulary:**
Wider array of specialized products that will continue to be available for unique customer needs.

"BD Vacutainer® represents a history of industry leadership, innovation, reliability and quality."
