Cleaning product guidelines
Alaris® System

Your Alaris System PC unit and modules require proper care and maintenance to remain in good repair. To ensure that your devices continuously work well, use the recommended cleaning products and correct cleaning and inspection processes. Refer to the applicable Alaris System Directions for Use for detailed cleaning instructions.

CareFusion has determined these products safe for Alaris System cleaning:

- **10% bleach** (sodium hypochlorite, 1-part bleach to 9-parts water)
- **3M Compublend II cleaning concentrate—Base V, with fragrance** (0.5 oz per gallon of water)
- **70% isopropyl alcohol (IPA)**
- **Brulin Maxima 128™ disinfectant cleaner** (1 oz per gallon of water)
- **Clorox Healthcare® Bleach Germicidal Cleaner (formerly marketed as Dispatch Hospital cleaner disinfectant)**
- **Dispatch® Hospital Cleaner Disinfectant Towels with Bleach**
- **Ecolab Asepti-Zyme instrument presoak and detergent** (1 oz per gallon of water)

Note: Water and mild detergents may also be used.

**IUI connectors**

Inter-unit interface (IUI) connectors are the black connection points on the sides of each module. **DO NOT** expose them to any of the cleaning solutions on the list other than 70% IPA.

DO NOT use the following chemicals that can damage the surfaces of the instrument:

- Acetone
- Ammonia
- Aromatic solvents (such as naphtha, paint thinner, benzene, Toluene, xylene)
- Chlorhexidine gluconate
- Chlorinated solvents (such as trichloroethane)
- Diethyleneglycol monobutyl ether
- Ethylene glycol monobutyl ether/2-butoxyethanol/Butyl Cellosolve
- Methyl ethyl ketone
- Non-healthcare grade solvents/solutions
- Quaternary ammonium chloride-based compounds (such as Dipropylene glycol n-propyl ether N-Alkyl [C12-18] Dimethyl benzyl ammonium chloride, N-Alkyl [C12-14] Dimethyl ethylbenzyl ammonium chloride)
- Solutions containing phosphoric acid (such as Foamy Q&A®)
- Undiluted alcohol
