**Indications for use**

BD ChloraShield™ IV dressing with chlorhexidine gluconate (CHG) antimicrobial is intended to cover and protect catheter sites and to secure devices to the skin. Common applications include covering and securing IV catheters, other intravascular catheters and percutaneous devices.

**Warnings**

- Do not use BD ChloraShield IV dressing with CHG antimicrobial on premature infants or infants younger than two months of age. Use of this product on premature infants may result in hypersensitivity reactions or necrosis of the skin.
- For external use only. Do not allow contact of this device with ears, eyes, mouth or mucous membranes.
- Do not use this device on patients with a known hypersensitivity to chlorhexidine gluconate. Adverse reactions such as irritations, sensitization and generalized allergic reactions have been reported with the use of chlorhexidine gluconate.
- If allergic reactions occur, discontinue use immediately and, if severe, contact a physician.

**Dressing application and removal instructions**

1. **Start**
   - Remove bottom liner
     - Start at the orange end and begin removal of the bottom liner.

2. **Apply**
   - Secure and smooth
     - Hold the dressing by the adhesive-free orange tab and center the dressing over the catheter site.
     - Smooth the dressing to secure it to the skin.

3. **Secure**
   - Remove the cover film
     - Remove the top film cover by lifting up on the white tab (marked 2) and slowly pull in the direction of the arrows.
     - Rub down any edges of the dressing that may not be fully adhered.

4. **Record**
   - Finalize application
     - Break off the extended orange tab at the dotted line and discard it.
     - The dressing with the built-in date strip is now in place.
     - The date can be noted on the strip prior to or following application.

**Dressing removal**

- Grasp corner of dressing.
- Pull slightly to stretch and loosen adhesive.
- Gently peel dressing back from skin.
