BD ChloraShield™ IV Surround
Dressing with CHG antimicrobial

Dressing application and removal instructions

1. Start
   Remove bottom liner
   • Start at the orange end and begin removal of the bottom liner (marked 1) from the back of the dressing until the liner reaches a fold, exposing part of the adhesive surface.
   • Hold the dressing by the extended orange tab with one hand and, using the other hand, hold the partially removed liner back along with the other half of the dressing.

2. Apply
   2. a. Apply dressing
      • Apply the exposed adhesive area over the catheter insertion site. (2. a)
      • Smooth the dressing into place. (2. b)
   2. b. Secure and smooth
      • Remove the remainder of the bottom liner. (3. a)
      • Smooth the rest of the dressing with the slit positioned around and under the catheter to fully surround the insertion site. (3. b)

3. Secure

4. Record
   Finalize application
   • Rub down any edges of the dressing that may not be fully adhered.
   • Break off the extended orange tab at the dotted line and discard it.
   The dressing with built-in date strip is now in place.
   • The date can be noted on the strip prior to or following application.

Indications for use
BD ChloraShield™ IV Surround dressing with chlorhexidine gluconate (CHG) antimicrobial is intended to cover and protect catheter sites and to secure devices to the skin. Common applications include covering and securing IV catheters, other intravascular catheters and percutaneous devices.

Warnings
• Do not use BD ChloraShield IV dressing with CHG antimicrobial on premature infants or infants younger than two months of age. Use of this product on premature infants may result in hypersensitivity reactions or necrosis of the skin.
• For external use only. Do not allow contact of this device with ears, eyes, mouth or mucous membranes.
• Do not use this device on patients with a known hypersensitivity to chlorhexidine gluconate. Adverse reactions such as irritations, sensitization and generalized allergic reactions have been reported with the use of chlorhexidine gluconate.
• If allergic reactions occur, discontinue use immediately and, if severe, contact a physician.
