CONNECT and PROTECT with BD Vacutainer® Luer-Lok™ Access Device

Recommended Urine Collection Steps from a Foley Catheter:

**STEP 1**
- Open bag
- Peel off paper backing from the BD Vacutainer® Luer-Lok™ Access Device package.
- Remove from package.
- Set aside.

**STEP 2**
- Occlude drainage tubing a minimum of 12 inches below the sampling port by bending and securing the tubing.
- Secure tubing with clamping device.
- Allow time for the urine to fill the tubing from point of clamp to slightly above the sampling port.

**STEP 3**
- Swab surface of the sampling port with antiseptic wipe.

**STEP 4**
Using aseptic technique, position the BD Vacutainer® Luer-Lok™ Access Device over the center of the sampling port. Push it in and rotate the Access Device clock-wise onto the sampling port until it fits securely.

**STEP 5**
- To perform your urine collection, center the BD Vacutainer® Plus C&S Preservative Tube over the holder portion of the Access Device and push it in.
- Once the tube is completely filled, remove the tube from the holder.
- Invert the tube 8-10 times.

**STEP 6**
- a. Repeat step 5 using the BD Vacutainer® Plus Conical UA Tube.
- b. Once tube is completely filled, remove the tube from the holder.

**STEP 7**
- After removing the last tube, hold the sampling port and remove the BD Vacutainer® Luer-Lok™ Access Device by rotating it counter clock-wise.

**STEP 8**
Undamp the drainage tube.

**STEP 9**
- Discard the BD Vacutainer® Luer-Lok™ device immediately into an approved sharps disposal container.

**CAUTION:** Handle all biological samples and blood collection “sharps” (lancets, needles, luer adapters, and blood collection sets) in accordance with the policies and procedures of your facility. Obtain appropriate medical attention in the event of any exposure to biologic samples. For example, through a puncture injury, biologic samples may transmit viral hepatitis, HIV (AIDS), or other infectious agents. Utilize any safety-engineered feature if the blood collection device provides one. Discard all blood collection “sharps” in biohazard containers approved for their disposal.
