

BD: Your trusted partner

Making the most of every day

The importance of providing the very best in homecare

A successful and effective transition from hospital to home is crucial for enhancing patient safety and comfort, and ensuring maximum efficiency for your business.

BD offers a fully joined up homecare portfolio made of medication management solutions for the administration of injectable drugs, which include ambulatory pumps, infusion disposables, and a comprehensive array of accessories and services such as training, elearnings, and repair.

BD's ambulatory infusion systems will put you at the frontline of infusion therapy. Our compact, lightweight systems are flexible and reliable; ensuring an effortless changeover with regard to patient safety between hospital and home. The BD BodyGuard™ infusion pump is a versatile, multitherapy ambulatory pump designed to address all infusion needs.

Whatever type of care your patients require, we have a solution to help them live a better quality of life, whilst supporting your business needs.

BD's solutions inspire confidence through simple, flexible and comprehensive solutions that enable better patient outcomes from hospital to home while offering you the support your business needs.

Your trusted partner

We understand that your business needs an infusion solution that is ready and working when you need it.

Supporting your professional activity with simple, versatile and comprehensive solutions, BD offers you the backup your business needs.

You can feel confident in our industry leading broad portfolio of infusion solutions, and have access to our full support and repair services. Alongside this, you have the option of our comprehensive training packages.

BD supports you throughout every stage of treatment delivery. When things are going well or whenever you need our assistance, we will be there to support you and your patients - so you can both feel assured of achieving the best outcomes. We can help ensure your patients have the infusion pump they need, and ensure that your clinicians are confident in their usage.

- Building clinician confidence through clinical training
- Face to face education and troubleshooting
- E-learning modules for clinicians and technicians

Our field-based technical service team is the center of excellence for the repair, service and calibration of your devices. Our team of trained professionals offer device user training, and our dedicated customer support team is committed to getting it right for you, on time, every time.

BD will be here to support you and your business long after your initial purchase.

Improving patients' lives with enhanced mobility

Every patient, and every setting in which our equipment is used, is unique. We know that, in every situation, mobility is crucial – so, we help enable a breadth of therapies to be delivered in a way that allows patients to get on with their lives.

Our ambulatory infusion systems offer homecare patients freedom to move around while receiving their medication safely and accurately.

And a wide variety of accessories and accompanying sets offer homecare flexibility.

So, whether they're up and about enjoying time with family and friends, sitting down, or simply being more comfortable in bed, our products can help patients to live life better.

Enabling effective treatment delivery for improved patient outcomes

Efficient and effective treatment delivery is fundamental to improving patient outcomes in a homecare setting. BD's portfolio of homecare devices and support services sustain more effective clinical outcomes by being accurate, lightweight, compact, versatile and flexible. All of these features allow you to deliver better patient outcomes across a broad range of therapies and settings.

Our servicing package, and product features such as auto restart after an occlusion, ensures minimal downtime. Our training options ensure your staff is totally competent and confident.

The BD BodyGuard™ is a highly flexible ambulatory infusion pump offering a number of therapy modes.

The BD BodyGuard™ infusion system

Please see 'BD BodyGuard™ infusion pump' brochure for more information.

We help enable a breadth of therapies to be delivered in a way that allows patients to get on with their lives.

Intuitive solutions. Increased efficiency. Satisfied patients.

Our intuitive offering enables your staff to deliver support to patients efficiently, not only improving overall patient satisfaction, but also helping you to save time and money.

We understand that infusion pumps offer the most benefit when they enable practitioners to spend more time meeting patients' needs. BD's easy-to-use pump and infusion sets allow your colleagues on the frontline to deliver better patient outcomes safely and effectively.

- Fewer steps to operation
- Clear color screen and messages
- Guided, quick setup for rapid use

A more intuitive pump means it is easier for the caregiver and the patient, resulting in increased patient satisfaction and fewer callouts. The BD BodyGuard™ infusion System is intuitive and easy to use.

The flexibility and convenience offered, helps free-up nurse time – improving workflow, helping reduce equipment cost and footprint, and allowing more time for reassuring patients.
