

Announcing a New Choice in Automated Microbiology Systems!

The BD Phoenix™ **Now Available** on the Federal Supply Schedule

Helping all people
live healthy lives

State-of-the-art Technology, Reliability at Your Fingertips

Government agencies have a new solution for their clinical microbiology needs from BD Diagnostics, a recognized worldwide leader in providing relevant, rapid, high quality solutions for clinical microbiology and infection control.

The BD Phoenix™ Automated Microbiology System is now available through the GSA Federal Supply Schedule – **Contract # V797P-7130A.**

The BD Phoenix™ Automated Microbiology System provides:

- Rapid, accurate and reliable detection of known and emerging antimicrobial resistance.

- Workflow efficiency utilizing automated nephelometry resulting in a standardized isolate inoculum and a reduction of technologist labor when combined with BD Phoenix™ AP.
- State-of-the-art data management to monitor, analyze and communicate actionable results directly to laboratorians and clinicians.

From collection through final report, with the BD Phoenix™ System your lab can improve patient and financial outcomes everywhere, every time utilizing BD EpiCenter™.
