

# BBL™ CHROMagar® MRSA II

## Simple and Flexible Detection of MRSA

**BBL CHROMagar MRSA II**  
delivers enhanced performance  
and flexible workflow\*<sup>1</sup>

“Methicillin-resistant *Staphylococcus aureus* infections continue to be significant causes of morbidity and mortality worldwide in both healthcare and community settings.”<sup>2</sup>

A strategy to reduce the transmission of MRSA in healthcare settings is to conduct active surveillance of patients admitted to hospitals or other healthcare facilities for colonization.<sup>2</sup>

Helping all people  
live healthy lives

# BBL™ CHROMagar® MRSA II

## Results in 20-26 Hours

**Easy to read; larger colonies\*<sup>1</sup> and vivid mauve color in as few as 20 hours:**

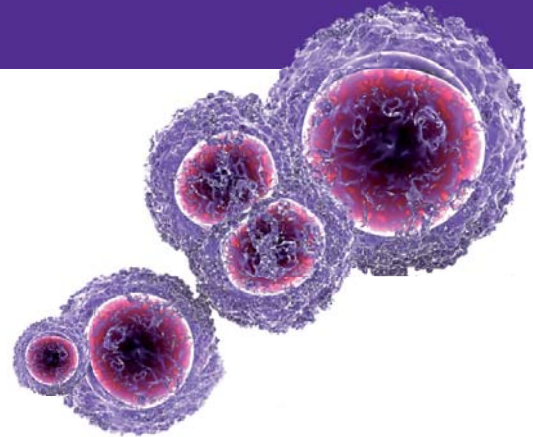

The new BBL CHROMagar MRSA II is a selective and differential medium for the direct detection of MRSA from nasal specimens. BBL CHROMagar MRSA II provides enhanced performance and more flexibility compared to traditional culture based methods.<sup>3</sup> With reliable results in as few as 20 hours, BBL CHROMagar MRSA II can be easily integrated into your routine laboratory workflow.

First Generation BBL CHROMagar MRSA

BBL CHROMagar MRSA II

## BBL CHROMagar MRSA II delivers:

### Faster time to result\* and a flexible reading range

- Final result in 20-26 hrs; fits into any routine laboratory workflow
- No additional confirmatory testing required

### Enhanced performance\*<sup>1,4</sup>

### Simple result interpretation

- Easy to read

\*Compared with BBL CHROMagar MRSA

### Product Information

Catalog #	Product Description
215228	BBL CHROMagar MRSA II (20 Plates)
215229	BBL CHROMagar MRSA II (100 Plates)
