**INSERTION INSTRUCTIONS**

**PowerGlide Pro™ Midline Catheter Diagram**

1. Identify the vein and insertion site.
2. Wipe the skin around the insertion site with an alcohol prep pad.
3. Insert the catheter using the power injection technique. Ensure all labeling and placement locations are modified according to the size and developmental age of the child.
4. Only administer medications or infusions if specifically indicated by the physician.
5. Care and preparation are specific to your institution’s policy.

**WARNINGs**

- Failure to ensure patency of the catheter prior to power injection studies may result in catheter failure.
- Failure to ensure patency of the catheter prior to placement may result in catheter failure.
- Do not insert the catheter into a vessel or vein. To help prevent a drop in the fluid level while inflation, wait a few seconds before removing the needle.
- The catheter must be secured in place to minimize the risk of catheter breakage and embolization.
- After use, the product may be a potential biohazard. Handle and dispose of in accordance with accepted biohazard disposal procedures.

**STABILIZATION DEVICE DEPRESsING DRESSING**

1. Do not:
   - Prepare areas for the use of the PowerGlide Pro™ Midline Catheter and Device.
   - Inserting the catheter using the power injection technique.

**POWER INJECtioN PROCEDURE**

1. Remove the needleless device cap and connect the power injection device.
2. Ensure the catheter is not damaged and is free of any other devices.
3. A sterile puncture technique should be used to access and engage the catheter.
4. Use aseptic techniques when the catheter is inserted or connected to other devices.
5. Avoid all particulate material that is not contained in the catheter.
6. If the needle is to be reinserted, the needle and use the needleless device to avoid introducing air.
7. Remove the needleless device to prevent introducing air into the catheter.
8. Do not puncture, tear, or fracture the catheter with the needle or guidewire during the procedure.
9. Discard housing and needle per institutional policy.
10. Do not use the catheter if there is evidence of mechanical or damage. Check the damage before using.
