Bard Access Systems
Hohn® Central Venous Catheter

The safety of silicone in an intermediate-term percutaneous catheter.

Permanent external clamping segment eliminates cost and inconvenience of extension sets; promotes aseptic care.

Soft tip reduces potential of venous wall erosion and perforation.

Easy-to-use preattached clamps helps prevent catheter damage.

Soft silicone suture wing helps provide reliable securment and minimizes trauma at the catheter insertion site.

Exclusive VitaCuff® Antimicrobial Cuff helps provide protection against catheter-related infections.

Durable, low-profile luer-lock adapters facilitate cleaning and improves patient comfort.

Medical-grade, radiopaque silicone construction for biocompatibility.

Catheter design facilitates threading of the catheter onto the guidewire and advancement of the catheter/guidewire assembly into the vessel.
Convenient, over-the-wire placement, anywhere in the hospital.

Procedural tray contents:
- Catheter
- Needles and Syringes
- Lidocaine HCl 1% Ampules
- Guidewire
- Dilator
- Scalpel
- VitaCuff® Cutter
- Non-absorbable Suture
- Povidone-iodine Swabsticks
- Povidone-iodine Ointment
- Gauze Pads
- Fenestrated Drape
- Injection Cap(s)

Hohn® Central Venous Catheters are packaged sterile in procedure-specific trays containing all catheter components. You are able to place or exchange the catheter at any time, in any location — in the OR, at the bedside, in the ER — for total parenteral nutrition, antibiotics and chemotherapy.

Hohn Central Venous Catheters are available in single-lumen and dual-lumen configurations.
