### Indications for Use:

The Per-Q-Cath® PICCs are indicated for short or long term peripheral access to the central venous system for intravenous therapy and blood therapy.

### Contraindications:

- The presence of device related infection, bacteremia, or septicemia is known or suspected.
- The patient's body size is insufficient to accommodate the size of the implanted device.
- The patient is known or is suspected to be allergic to materials contained in the device.
- Past irradiation of prospective insertion site.
- Previous episodes of venous thrombosis or vascular surgical procedures at the prospective placement site.
- Local tissue factors will prevent proper device stabilization and/or access.

Please consult product labels and inserts for any indications, contraindications, hazards, warnings, cautions and instructions for use.
Bard Access Systems brings you the 2 Fr Per-Q-Cath® PICC catheter designed to help meet the needs of small vein patients. The Per-Q-Cath® PICC catheter is made of soft silicone and the pliable suture wings are Statlock® stabilization device compatible.

- Available with or without a stylet to meet clinician preference
- Kit components not made with natural rubber latex
- Shortened hub body designed to accommodate smaller patient size
- Depth markings every 1 cm for accurate measurement and trimming

- Flat hub lies against the skin and provides ease of dressing
- Clearly marked French size
- Clearly labeled depth markings every 1 cm
- Silicone filled suture wings are pliable and Statlock® stabilization device compatible
- Medical grade radiopaque silicone
- 30 cm length
