

# BD<sup>®</sup> Assessments

A powerful first step toward clinical transformation across the continuum of care.

From vascular access and sharps safety to surgical prep and specimen management, each of our assessments are designed to deliver the data, insights and BD product and solution recommendations needed to help you address variation, support compliance and drive meaningful transformation across the continuum of care.

## **BD<sup>®</sup> Vascular Access Management Assessment**

Designed to identify variation and inefficiencies across the vascular access pathway that may be impacting outcomes, workflow and costs

## **BD<sup>®</sup> Safe Handling Assessment**

Designed to identify potential exposure risks across the hazardous drug journey to help inform safe handling practices and training needs

## **BD<sup>®</sup> Sharps Safety Assessment**

Designed to identify inconsistent safety device practices to inform efforts to reduce risk, reinforce training and drive standardization

## **BD<sup>®</sup> Clinical Connect Program**

Designed to evaluate urinary product knowledge and practice to help identify and support ongoing training needs

## **BD<sup>®</sup> Power in Prevention<sup>™</sup> Program**

Designed to assess variability in surgical practices to help support standardization, improved efficiency and potential cost reduction

## **BD<sup>®</sup> Integrated Bloodstream Infection (BSI) Solution**

Designed to evaluate diagnostic and clinical workflows related to BSI to help support faster identification, improved coordination and reduced risk

## **BD<sup>®</sup> Preanalytical Quality Check (PAQC)—Venous Blood**

Designed to evaluate collection and handling practices that may impact lab accuracy and patient care decisions

## **BD<sup>®</sup> Preanalytical Quality Check (PAQC)—Urine**

Designed to evaluate the urine specimen pathway—from collection to processing—to help reduce variability and support more reliable results
