

# BD Alliance Program

## High-quality, critical-to-health products made in North America can help bring certainty to your clinical operations.

At BD, we are committed to helping you deliver optimal patient outcomes by providing high-quality medical devices, available when you need them. By providing you with a reliable supply of robust and clinically validated products, you can deliver care confidently.

### The certainty you need today

BD is trusted to provide billions of high-quality, innovative products to U.S. hospitals, labs and research organizations each year.

#### Trusted quality:

End-to-end product ownership

#### North American supply:

Local manufacturing capabilities, with 30 plants across the U.S.

#### Clinical innovation:

Ongoing development with clinicians to address specific needs

With full accountability and direct oversight of the entire BD process, we have complete control. You can be confident our products deliver safe and reliable performance for clinicians and patients.

#### We ensure quality at every step
