

Security Patches: BD Assurity Linc™

June 2023

BD has identified patches from Microsoft® that have been identified as critical or security related through March 2023 for the BD Assurity Linc™ on Windows LTSC 1809. These patches were not found to adversely affect BD products and will be applied according to customers' service agreements.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s).

Microsoft® patches

Patch name	Description	Patch ID	Notes
Security update for Windows 10 1809.	This update addresses security issues in the Windows operating system.	KB5023702	
Cumulative security update for .NET framework 3.5 and 4.7.2 for Win 10 1809.	This security update addresses a vulnerability in the MSDIA SDK where an untrusted pointer dereference can cause memory corruption. It also addresses a vulnerability where the Visual Studio WMI can be used to lead to a potential denial of service.	KB5022511
