

BD Product Name: **Care Coordination Engine**

Date of Critical or Security Patches: Oct 2021

Abstract: Critical or Security Patches – Oct 2021

Microsoft® & Third-Party Patches

BD has identified patches from Microsoft that have been identified as critical or security related for Nov 2021. These patches were not found to adversely affect BD products and will be applied according to customers' service agreement.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s).

Patch Name	Description	Patch ID	Notes
Cumulative Update for Windows Server 2016 for x64-based Systems.	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.	KB5007192	N/A
Microsoft .NET Framework 4.8	This update is included in the Security and Quality Rollup that's dated November 9, 2021. Parts of this update were previously released in the rollup that's dated October 13, 2020.	KB5007154	N/A
Security Update for Microsoft Windows Monthly Security Only Updates.	The Microsoft Security Response Center (MSRC) investigates all reports of security vulnerabilities affecting Microsoft products and services, and provides the information here as part of the ongoing effort to help you manage security risks and help keep your systems protected.	KB5007255	N/A

Security Monthly Quality Rollup for Windows Server 2012 R2 for x64-based Systems.	A security issue has been identified in a Microsoft software product that could affect your system.
