Security Patches:

Care Coordination Engine

July 2026

BD has identified patches from Microsoft® that have been identified as critical or security related for July 2026. These patches should NOT be installed on CCE at this time.

Customers that maintain patches independent of BD automated delivery should ensure these actions are not performed as the acting responsible entity in order to maintain the correct security posture of the system(s).

Note: These patches only apply to the latest supported version(s) of the BD offering.

Microsoft® patches

Patch name	Description	Patch ID	Notes
2026-07 Security Monthly Quality Rollup for Windows Server 2012 R2 for x64-based Systems (KB5099444)	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.	KB5099444	N/A
2026-07 Servicing Stack Update for Windows Server 2012 R2 for x64-based Systems (KB5106412)	Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.	KB5106412	N/A
2026-07 Security and Quality Rollup for .NET Framework 3.5, 4.6.2, 4.7, 4.7.1, 4.7.2, 4.8 for Windows Server 2012 R2 for x64 (KB5102205)	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.	KB5102205	N/A
Windows Malicious Software Removal Tool x64 - v5.143	After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer.	KB890830	N/A

2026-07 Cumulative Security Update for Internet Explorer 11 for Windows Server 2012 R2 for x64-based systems (KB5099415)	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.	KB5099415	N/A

Note: Patches could not be validated due to environmental issues.
