BD Product Security - Security Patch Recommendations
BD Biosciences Product Name: BD FACS™ Sample Prep Assistant III

January / February / March 2022

Critical and/or Security Patches: The January 2022 security rollup/cumulative update was released on January 11, 2022. The February 2022 security rollup/cumulative update was released on February 8, 2022. The March 2022 security rollup/cumulative update was released on March 8, 2022.

Microsoft™ and Third-Party Patches
BD has identified patches from Microsoft™ that have been indicated as security related for the months of January, February and March. The BD products listed above have been tested with security patches from the January, February and March rollup/cumulative releases installed. The patches in these updates were not found to adversely affect operation of the listed BD products.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s). For products that are supported remotely by BD Service, patches will be applied according to customers' service agreements.
