

BD Product Security - Patch Whitelist / Blacklist

BD Biosciences Product Name: BD FACSCanto™ 10-Color Cell Analyzers (IVD and RUO)

April 2020

Critical and/or Security Patches: IE Scripting Engine patch was released with February 2020 security updates, SMBv3 Remote Code Execution patch was released with March 2020 security updates and the Adobe Type Manager Remote Code Execution patch was released with the April 2020 security updates. The April 2020 security rollup/cumulative update was released in April 2020.

Microsoft® and Third-Party Patches

BD has identified patches from Microsoft that have been indicated as critical or security related for the IE Scripting Engine, Server Message Block and Adobe Type Manager vulnerabilities. Microsoft has also released a security update for the month of April. The BD products listed above have been tested with security patches from the March and April rollup/cumulative releases installed. The patches in these updates were not found to adversely affect operation of the listed BD products.

Note: There were no updates released in March or April for Windows 7. Windows 7 support officially ended as of January 14, 2020.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s). For products that are supported remotely by BD Service, patches will be applied according to customers' service agreements.

Patch Name	Patch Description	Patch ID	Notes
Feb 11, 2020 – KB4532691 (CVE-2020-0674)	This security update includes quality improvements.
