

BD Product Security - Security Patch Recommendations

BD Biosciences Product Name: BD FACSLyric™ Cell Analyzers (IVD and RUO)

April / May / June 2021

Critical and/or Security Patches: The April 2021 security rollup/cumulative update was released on April 13, 2021. The May 2021 security rollup/cumulative update was released on May 11, 2021. The June 2021 security rollup/cumulative update was released on June 8, 2021.

Microsoft™ and Third-Party Patches

BD has identified patches from Microsoft™ that have been indicated as security related for the months of April, May and June. The BD products listed above have been tested with security patches from the April, May and June rollup/cumulative releases installed. The patches in these updates were not found to adversely affect operation of the listed BD products.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s). For products that are supported remotely by BD Service, patches will be applied according to customers' service agreements.
