

Security Patches: BD Pyxis™ Anesthesia Station 4000

March 2024

BD has identified patches from Microsoft® that have been identified as critical or security related for March 2024. These patches were not found to adversely affect BD products and will be applied according to customers' service agreements.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s).

Microsoft® patches

Patch name	Description	Patch ID	Notes
Windows Malicious Software Removal Tool x64 - v5.122	After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com.	KB890830	N/A
2024-03 Cumulative Update for Windows 10 Version 1607 for x64-based Systems	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article. After you install this update, you may have to restart your system.	KB5035855	N/A
2024-03 Servicing Stack Update for Windows 10 Version 1607 for x64-based Systems	Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.	KB5035962	N/A

2024-03 Cumulative Update for Windows 10 Version 21H2 for x64-based Systems	Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information. After you install this item, you may have to restart your computer.	KB5035845	N/A

Windows Malicious Software Removal Tool x64 - v5.122	After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer. A new version of the tool will be offered every month. If you want to manually run the tool on your computer, you can download a copy from the Microsoft Download Center, or you can run an online version from microsoft.com. This tool is not a replacement for an antivirus product. To help protect your computer, you should use an antivirus product.	KB890830	N/A

Microsoft® patches

Patch name	Description	Patch ID	Notes
2024-03 Servicing Stack Update for Windows Server 2012 R2 for x64-based Systems (KB5035968)	This update makes quality improvements to the servicing stack, which is the component that installs Windows updates. Additionally, reliability improvements to the secure boot servicing stack were made to help with safe roll out of upcoming security updates for Secure Boot. Servicing stack updates (SSU) makes sure that you have a robust and reliable servicing stack so that your devices can receive and install Microsoft updates.	KB5035968	N/A
2024-03 Servicing Stack Update for Windows Server 2016 for x64-based Systems (KB5035962)	This update makes quality improvements to the servicing stack, which is the component that installs Windows updates. Additionally, reliability improvements to the secure boot servicing stack were made to help with safe roll out of upcoming security updates for Secure Boot. Servicing stack updates (SSU) makes sure that you have a robust and reliable servicing stack so that your devices can receive and install Microsoft updates.	KB5035962	N/A
2024-03 Security Monthly Quality Rollup for Windows Server 2012 R2 for x64-based Systems (KB5035885)	This cumulative security update includes improvements that are part of update KB5034819 (released February 13, 2024). This update also makes improvements for the following issue: The Local Security Authority (LSA) might fail while interfacing with third-party software.	KB5035885	N/A

2024-03 Cumulative Update for Windows Server 2016 for x64-based Systems (KB5035855)	<p>This security update includes quality improvements. When you install this KB:</p> <p>This update makes miscellaneous security improvements to internal OS functionality. No additional issues were documented for this release.</p>	KB5035855	N/A
2024-02 Cumulative Update for .NET Framework 3.5, 4.7.2 and 4.8 for Windows Server 2019 for x64 (KB5034683)	<p>This article describes the security and cumulative update for 3.5, 4.7.2 and 4.8 for Windows 10, version 1809 and Windows Server 2019.</p> <p>Security Improvements There are no new security improvements in this release. This update is cumulative and contains all previously released security improvements.</p> <p>Quality and Reliability Improvements For a list of improvements that were released with this update, please see the article links in the Additional Information section of this article.</p>	KB5034683	N/A
2024-03 Cumulative Update for Windows Server 2019 for x64-based Systems (KB5035849)	<p>This security update includes improvements. When you install this KB:</p> <p>The update affects Active Directory domains that host mobile device management (MDM) providers. They can transition from “Compatibility mode” to the strong certificate mapping “Enforcement mode.” To do this, they can allow an Active Directory Key Distribution Center (KDC) to read user security identifiers (SID) from the Subject Alternative Name (SAN). Then, the providers can populate those values. To learn more, see:</p>	KB5035849	N/A
Windows Malicious Software Removal Tool x64 - v5.122	<p>The Windows Malicious Software Removal Tool (MSRT) helps remove malicious software from computers. Microsoft releases the MSRT on a monthly cadence as part of Windows Update or as a standalone tool. Use this tool to find and remove specific prevalent threats and reverse the changes they have made.</p>	KB890830	N/A
