

# Security Patches: Identity Management

April 2024

BD has identified patches from Microsoft® that have been identified as critical or security related for April 2024. These patches were not found to adversely affect BD products and will be applied according to customers' service agreements.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity to maintain the correct security posture of the system(s).

Microsoft® patches

Patch name	Description	Patch ID	Notes
2024-04 Security Monthly Quality Rollup for Windows Server 2012 R2 for x64-based Systems (KB5036960)	Windows 8.1 reached the end of support (EOS) on January 10, 2023, at which point technical assistance and software updates are no longer provided. If you have devices running Windows 8.1, we recommend upgrading them to a more current, in-service, and supported Windows release. If devices do not meet the technical requirements to run a more current release of Windows, we recommend that you replace the device with one that supports Windows 11.	<a href="#">KB5036960</a>	N/A
