

THIS IS NOT YOUR GRANDMA'S PAP

It's time to change the conversation about screening, because together we can help eliminate cervical cancer.

Let's talk BD Onclarity™ HPV self-collection

BD

Join the movement. Increase access to cervical cancer screening.

Connect to a lab that offers
BD Onclarity™ HPV assay.

The most comprehensive HPV test results you can get³⁻⁷

The only HPV assay that supports all ASCCP Extended Genotyping Guidelines⁸

Find a lab near you

*Self-collected vaginal specimens, obtained in a healthcare setting, can be tested as an alternative specimen type when cervical sampling is either contraindicated or cervical samples otherwise cannot be obtained.¹

†There are currently two FDA-approved HPV tests with extended genotyping with different configurations. The BD Onclarity™ HPV Assay was the only FDA-approved test with extended genotyping when the evidence review for the extended genotyping guidelines started, thus rendering the guidelines tailored specifically to the BD Onclarity™ HPV Assay.³

ASCCP, American Society for Colposcopy and Cervical Pathology; FDA, Food and Drug Administration; HPV, human papillomavirus.

Your voice makes a difference

Use it to help share the benefits of asking for BD Onclarity™

Ending cervical cancer

- Together, we can help eliminate cervical cancer in our lifetime. Let's talk about it.
- Did you know that over half of cervical cancers occur in people who have not been screened in the last 5 years or who have never been screened?¹
- **Cervical cancer is usually treatable if it's caught early.² That's why screening is so important.**

Screening using self-collection

- This is NOT your grandma's Pap. It's simple, private and easy-to-use.
- BD Onclarity™ HPV self-collection looks like a long Q-tip and takes less than a minute to do in a private space at your doctor's office.
- The best part? No pelvic exam is required.

What you can do

- Ask your doctor about cervical cancer screening using BD Onclarity™ HPV self-collection.
- Encourage your friends and loved ones to get screened!
- Share this message to help make cervical cancer screening more accessible.
