

BD SafetyGlide™ Needle

Safety without compromise

Efficiency through ease of activation

SafetyGlide™ Needles have Activation-Assist™ Technology, making a safe injection easier and more efficient.

- Unique Activation-Assist™ Technology feature means a fast and smooth activation while keeping finger well behind the needle.
- Fluid single-finger activation requiring minimal training and virtually no change in clinician technique.
- SafetyGlide™ Needles can help keep clinicians safe from accidental needlestick injuries.
- Detachable needle that can fit on any conventional luer syringe and facilitate standardization and SKU reduction across the facility.

The SafetyGlide™ Needle is more preferred than competitive brands globally*

Scan this code to watch a video on how to use the **SafetyGlide™ Needle**:

*Based on a 2025 global double-blinded survey conducted by BD among n=575 pharmacists (including pharmacy assistants and technicians) and nurses across the US, Canada, UK, France, Australia, Brazil, and India (no pharmacists were included in the India sample). All respondents primarily worked in hospital or acute care settings, had 3–35 years of experience, and regularly used hypodermic needles and syringes as part of their professional role. Each participant had experience with at least one BD needle and syringe and a competitive product within the past year. Product categories evaluated included conventional needles, blunt fill/filter needles, safety pivoting needles, safety shielding needles, and syringes.

SafetyGlide™ Needle

SafetyGlide™ Needles		
Product number	Description	Packaging
305921	27 G x 5/8 in.	50/box, 500/case
305901	25 G x 5/8 in.	50/box, 500/case
305916	25 G x 1 in.	50/box, 500/case
305902	23 G x 1 in.	50/box, 500/case
304387	23 G x 1 1/2 in.	50/box, 500/case
305915	21 G x 1 in.	50/box, 500/case
305917	21 G x 1 1/2 in.	50/box, 500/case
