This document is not intended as a supplement to or replacement for the Instructions for Use. Please consult product labels and inserts for instructions for use, indications, contraindications, warnings and precautions.

* 24 gauge catheter systems should not be used with power injectors.
Secure connections

> Vent plug must remain in place during insertion for
  - Flashback
  - Blood containment

> BD Q-Syte™ Luer access split septum
Release seal

- Loosens catheter for easier advancement
- Pull back ~ 1/8 inch
“Color to white everything tight”

> Push colored platform and white grip back together
Keep it **sharp**
Initial blood return

BD Instaflash™ Needle Technology

> Immediate blood return is seen along the catheter
Lower and advance

> Lower and advance the entire catheter and needle unit slightly to ensure that the catheter tip is within the vessel.
Forward first

Pad to tab
BD Nexiva™ Closed IV Catheter System—Dual Port

Forward first
Secondary flash

- Blood return continues up the extension
- Continuous flow confirms the catheter tip is within the vessel lumen
- Quickeens as needle is withdrawn
Stabilize catheter and remove needle
Secure and apply the sterile dressing.
Clamp and replace vent plug

> Clamp extension set
  - Prevents blood leakage

> Replace vent plug with BD Q-Syte™ Device
BD Nexiva™ Closed IV Catheter System—Dual Port

Unclamp and flush

> Release the clamp to flush or infuse
> Complete securement of extension tubing
> Single lumen catheter

- Compatible meds only
Disconnection:

› Clamp before disconnecting to minimize the reflux of blood

› Hold the BD Q-Syte™ Device during disconnection and use a straight-off approach
