Product Discontinuation Notice: BD® PhaSeal™ Closed System Transfer Devices (CSTD) and BD® SmartSite™ VialShield Vial Access Devices

Dear Valued BD Customer/Distributor,

You are receiving this discontinuation notice because your organization is an active purchaser of the PhaSeal™ Closed System Transfer Devices (CSTD) and/or the SmartSite™ VialShield Vial Access Devices.

NOTE: This does **NOT** pertain to the BD® PhaSeal™ **Optima** Closed System Transfer Devices.

After careful consideration and in alignment with the BD commitment to innovation and safety, we have made the decision to retire the original PhaSeal™ CSTD and the SmartSite™ VialShield Vial Access Devices. Based on current production schedules, we anticipate that inventory of the discontinued PhaSeal™ and SmartSite™ VialShield codes in the United States will be depleted by July 1, 2026.

Upon inventory depletion, we are confident that the recommended alternatives of the PhaSeal™ Optima CSTD System provided in **Table 1** below will serve your hazardous drug safety preparation and administration needs.

We understand the recent decision to retire the PhaSeal™ Closed System Transfer Devices (CSTD) and the SmartSite™ VialShield Vial Access Devices may raise questions about supply continuity, safety and workflow efficiency in your facility.

At BD, we are committed to supporting you through this transition with confidence and ease. Located below, you will find support tools and resources to help successfully transition your organization to the PhaSeal™ Optima CSTD, the next generation of hazardous drug protection, with design innovations that advance safety, performance, ergonomics and ease of use to address your clinical and economic requirements.

Thank you for choosing BD and for your continued interest in our products. If you have further questions or require assistance from your local BD MDS Oncology Account Executive, please contact us using the following resources below.
