

Working together. Moving in sync. Powered by one.

Keep your team in the flow with the updated BD Alaris™ Infusion System.

The BD Alaris™ Infusion System can help forward thinking health systems create automated workflows that can improve medication safety. Standardize your infusion administration practice across hospitals with a single, integrated solution.

The power of one system that scales across your infusion needs:

- ✓ Centralized dedicated user interface for major modalities: large volume pump, syringe, and patient controlled analgesia (PCA) with unique EtCO2 patient monitoring
- ✓ A suite of applications, integration with EMR and advanced data analytics, infusion sets and fluids portfolios
- ✓ Meets the latest safety and security standards for infusion delivery

Count on the power of one infusion system,
so your clinical team can work as one.
Explore the BD Alaris™ Infusion System

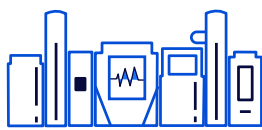

Bringing it all together

One infusion platform. Multiple modalities. Numerous care areas.

The BD Alaris™ Infusion System is inspired by the way your team flows. It's the **only** infusion system to offer multiple modalities that work independently and together on one infusion platform to accurately deliver infusions.

The BD Alaris™ Infusion System:

Powered by a single, integrated platform

Only one

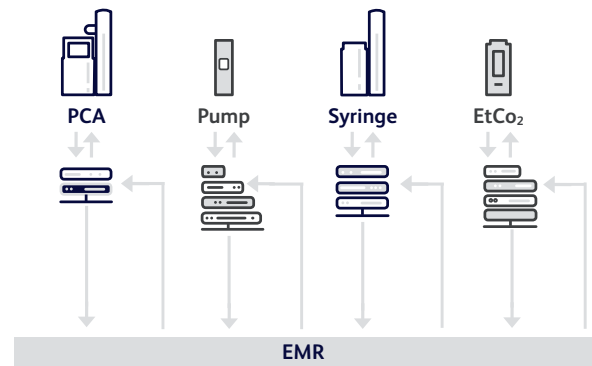

- User interface
- EMR integration*
- Drug library
- Infusion database
- Cybersecurity strategy
- Server
- Wireless card
- Battery
- Set of parts
- Education curriculum

*for only LVP, SYR

EMR

Other systems: Current industry standard

Disparate usability, EMR integration, cybersecurity strategy and maintenance

Simple. Secure. In sync.

With large volume pump, syringe, patient-controlled analgesia (PCA) and respiratory monitoring modalities on one platform, you can streamline workflows and manage infusion data across multiple care areas.

Enhanced safety & security

Know you're supported with a comprehensive system that meets the latest cybersecurity standards and regulatory requirements

Simplified workflows

Streamline workflows with a single centralized user interface and EMR integration for multiple modalities

Comprehensive support

Access round-the-clock expert technical, clinical and IT support teams backed by decades of experience and deep expertise

Rely on the go-to infusion system to keep your team flowing.
