BD Pyxis™ RapidRx Solutions

RFID

RFID-enabled pharmacy automation solutions help enable comprehensive and efficient medication management for your retail and outpatient pharmacies

Will Call Management

- Automate storage, retrieval, and return to stock
- Utilizes RFID technology to accurately deliver the right prescription to the right patient
- Help reduce prescription retrieval time as well as the return to stock steps

Controlled Substance Management

- RFID SmartBaskets provide stock storage and prescription filling of controlled medications
- Accountability through audit trails of every transaction
- Maintain integrity of drug supply chain

Central Distribution

- Track the prescription journey
- Help reduce time in receiving orders from central fill with automation
- Secure storage and transport via RFID enabled SmartBaskets

SPEED

Reduced time for prescription pickup and less steps for return to stocks

ACCURACY

Right prescription to the right customer every time

SECURITY

Control access and accountability through the drug supply chain
