

BD Parata Assist™

Blister Production Guidance System

The efficiency of your blister packaging program is critical to the improvement of the health and safety of your patients and the growth of your business.

Minimize human error

BD Parata Assist™ bridges the gap between completely manual blister packaging and full-on automation. It allows for a semi-automated filling process, which can lead to more accurate and efficient production of single- and multi-dose blister cards.

Highlighted Features

- Barcode and biometric scanning ensure secure production and track responsibility.
- Touch screen computer offers on-screen guidance for accurate medication placement.
- Advanced software allows for customized labels.
- Production tray fills 8-12 cards at a time.
- More secure placement of exception meds when using BD Parata™ automation.
