

BD Product Security - Security Patch Recommendations

BD Biosciences Product Name: BD FACSCanto™ 10-Color Cell Analyzers (IVD and RUO)

October / November / December 2021

Critical and/or Security Patches: The October 2021 security rollup/cumulative update was released on October 12, 2021. The November 2021 security rollup/cumulative update was released on November 9, 2021. The December 2021 security rollup/cumulative update was released on December 14, 2021.

Microsoft™ and Third-Party Patches

BD has identified patches from Microsoft™ that have been indicated as security related for the months of October, November and December. The BD products listed above have been tested with security patches from the October, November and December rollup/cumulative releases installed. The patches in these updates were not found to adversely affect operation of the listed BD products.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s). For products that are supported remotely by BD Service, patches will be applied according to customers' service agreements.

Windows™ 10 Enterprise:

Patch Name	Patch Description	Patch ID	Notes
