

BD Product Name: **BD Pyxis™ IV Prep**

Date of Critical or Security Patches: February 2021

Abstract: Critical or Security Patches – February 2021

Microsoft® & Third-Party Patches

BD has identified patches from Microsoft that have been identified as critical or security related for February 2021. These patches were not found to adversely affect BD products and will be applied according to customers' service agreement.

Customers that maintain patches independent of BD automated delivery should ensure the validated patches are installed on their BD systems as the acting responsible entity in order to maintain the correct security posture of the system(s).

Patch Name	Description	Patch ID	Notes
2021-02 Security and Quality Rollup for .NET Framework 3.5, 4.5.2, 4.6, 4.6.1, 4.6.2, 4.7, 4.7.1, 4.7.2, 4.8 for Windows Server 2012 R2 for x64	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update,	KB4603004	None
2021-02 Security Monthly Quality Rollup for Windows Server 2012 R2 for x64-based Systems	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update	KB4601384	None
Windows Malicious Software Removal Tool x64 - v5.85	After the download, this tool runs one time to check your computer for infection by specific, prevalent malicious software (including Blaster, Sasser, and Mydoom) and helps remove any infection that is found. If an infection is found, the tool will display a status report the next time that you start your computer.	KB890830	None

2021-02 Security Only Update for .NET Framework 4.6, 4.6.1, 4.6.2, 4.7, 4.7.1, 4.7.2, 4.8 for Windows Server 2012 R2 for x64	TA security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update	KB4602960	None
2021-02 Security and Quality Rollup for .NET Framework 4.8 for Windows Server 2012 R2 for x64	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update	KB4601058	None
2021-02 Security Only Quality Update for Windows Server 2012 R2 for x64-based Systems	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update	KB4601349	None
2021-02 Security Only Update for .NET Framework 4.8 for Windows Server 2012 R2 for x64	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update	KB4601092	None

2021-02 Servicing Stack Update for Windows Server 2016 for x64-based Systems	Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update, see the associated Microsoft Knowledge Base article for more information.	KB5001078	None
------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------	------

2021-02 Servicing Stack Update for Windows Server 2016 for x64-based Systems	Install this update to resolve issues in Windows. For a complete listing of the issues that are included in this update	KB5001078	None
2021-02 Cumulative Update for Windows Server 2016 for x64-based Systems	A security issue has been identified in a Microsoft software product that could affect your system. You can help protect your system by installing this update from Microsoft. For a complete listing of the issues that are included in this update	KB4601318	None

Patch Name	Description	Patch ID	Notes
2021-02 Security Monthly Quality Rollup for Windows Server 2012 R2 for x64-based Systems	This security update includes improvements and fixes that were a part of update KB4598285 (released January 12, 2021) and addresses the following issues: Addresses historical daylight saving time (DST) updates and corrections for the Palestinian Authority. Addresses an issue with German translations of Central European Time. Security updates to Windows App Platform and Frameworks, Windows Hybrid Cloud.	KB4601384	None
Windows Malicious Software Removal Tool x64 - v5.85	The Windows Malicious Software Removal Tool (MSRT) helps remove malicious software from computers that are running any of the following operating systems: Windows 10 Windows Server 2019 Windows Server 2016 Windows 8.1 Windows Server 2012 R2 Windows Server 2012 Windows 7 Windows Server 2008 R2 for x64-based Systems	KB890830	None

2021-02 Security and Quality Rollup for .NET Framework 3.5, 4.5.2, 4.6, 4.6.1, 4.6.2, 4.7, 4.7.1, 4.7.2, 4.8 for Windows Server 2012 R2 for x64	This security update addresses a denial of service vulnerability in .NET Framework.	KB4603004	None
2021-02 Security Only Quality Update for Windows Server 2012 R2 for x64-based Systems	This security update includes quality improvements. Key changes include: Adds historical daylight saving time (DST) updates and corrections for the Palestinian Authority. Addresses an issue with German translations of Central European Time. Security updates to Windows App Platform and Frameworks, Windows Hybrid Cloud Networking, and Windows Core Networking.	KB4601349	None
Security Only Update for .NET Framework 4.6, 4.6.1, 4.6.2, 4.7, 4.7.1, 4.7.2, 4.8 for Windows 8.1 and Windows Server 2012 R2	This security update addresses a denial of service vulnerability in .NET Framework	KB4602960	None
Security and Quality Rollup for .NET Framework 4.6, 4.6.1, 4.6.2, 4.7, 4.7.1, 4.7.2 for Windows 8.1, RT 8.1, and Windows Server 2012 R2	This security update addresses a denial of service vulnerability in .NET Framework.	KB4601048	None
Security Only Update for .NET Framework 4.6, 4.6.1, 4.6.2, 4.7, 4.7.1, 4.7.2 for Windows 8.1 and Windows Server 2012 R2	This security update addresses a denial of service vulnerability in .NET Framework.	KB4601094	None

<p>2021-02 Security Monthly Quality Rollup for Windows Embedded Standard 7 for x86-based Systems</p>	<p>This security update includes improvements and fixes that were a part of update KB4598279 (released January 12, 2021) and addresses the following issues: Adds historical daylight saving time (DST) updates and corrections for the Palestinian Authority. Addresses an issue with German translations of Central European Time. Security updates to Windows App Platform and Frameworks, Windows Hybrid Cloud Networking, and Windows Core Networking.</p>	<p>KB4601347</p>	<p>None</p>
<p>2021-02 Cumulative Update for Windows Server 2016 for x64-based Systems</p>	<p>This security update includes quality improvements. Key changes include: Enables administrators to disable standalone Internet Explorer using a Group Policy while continuing to use Microsoft Edge's IE Mode. Updates Internet Explorer's About dialog to use the standard modern dialog. Addresses an issue with a Service Host (svchost.exe) process that causes excessive CPU usage in some Input Method Editor (IME) language environments, such as Traditional Chinese. This issue occurs when you try to add an input method in Control Panel. Corrects historical daylight savings time (DST) information for the Palestinian Authority.</p>	<p>KB4601318</p>	<p>None</p>

	<p>Addresses an issue with German translations of Central European Time.</p> <p>Addresses an issue that causes LSASS.exe to stop working because of a race condition that results in a double free error in Schannel. The exception code is c0000374, and the Event Log displays Schannel event 36888, fatal error code 20, and error state 960. This issue occurs after installing Windows updates from September 2020 and later.</p> <p>Addresses an issue that might cause systems that use BitLocker to stop working and display the error 0x120 (BITLOCKER_FATAL_ERROR).</p> <p>Addresses an issue that prevents scheduled tasks that have multiple actions from running again if you have previously disabled them while they were running.</p> <p>Addresses an issue that fails to log events 4732 and 4733 for Domain-Local group membership changes in certain scenarios. This occurs when you use the "Permissive Modify" control; for example, the Active Directory (AD) PowerShell modules use this control.</p> <p>Addresses an issue that incorrectly reports that Lightweight Directory Access Protocol (LDAP) sessions are unsecure in Event ID 2889. This occurs when the LDAP session is authenticated and sealed with a Simple</p>		
--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

	<p>Authentication and Security Layer (SASL) method.</p> <p>Addresses an issue with Server Message Block (SMB). This issue incorrectly logs the Microsoft-Windows-SMBClient 31013 event in the Microsoft-Windows-SMBClient or Security event log of an SMB client when an SMB server returns STATUS_USER_SESSION_DELETED. This issue occurs when SMB client users or applications open multiple SMB sessions using the same set of Transmission Control Protocol (TCP) connections on the same SMB Server. This issue most likely occurs on Remote Desktop Servers.</p> <p>Addresses an issue that causes the LanmanServer service to stop unexpectedly. This issue occurs if the OptionalNames registry value is set and the service restarts.</p> <p>Addresses an issue that causes stop error 0x54 in SRV2.SYS.</p> <p>Security updates to Windows App Platform and Frameworks, Windows Apps, Windows Cloud Infrastructure, Windows Authentication, Windows Fundamentals, Windows Virtualization, Windows Core Networking, and Windows Hybrid Cloud Networking.</p>		
--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

2021-02 Servicing Stack Update for Windows Server 2016 for x64-based Systems	This update makes quality improvements to the servicing stack, which is the component that installs Windows updates. Servicing stack updates (SSU) makes sure that you have a robust and reliable servicing stack so that your devices can receive and install Microsoft updates.	KB5001078	None
2021-02 Cumulative Update for .NET Framework 3.5, 4.7.2 and 4.8 for Windows 10 Version 1809	This security update addresses a denial of service vulnerability in .NET Framework.	KB4601887	None
2021-02 Servicing Stack Update for Windows 10 Version 1809 for x86-based Systems	This update makes quality improvements to the servicing stack, which is the component that installs Windows updates. Servicing stack updates (SSU) makes sure that you have a robust and reliable servicing stack so that your devices can receive and install Microsoft updates. Additionally, this update enables a single package design that incorporates the servicing stack update (SSU) into the latest cumulative update (LCU). Combining the SSU and LCU update into a single package provides a more seamless deployment and installation experience.	KB4601393	None
2021-02 Cumulative Update for Windows 10 Version 1809 for x86-based Systems	Updates to improve security when using input devices such as a mouse, keyboard, or pen. Updates for verifying usernames and passwords. Addresses a possible elevation of privilege vulnerability in the win32k component. Security updates to Windows App Platform and	KB4601345	None

	Frameworks, Windows Apps, Windows Input and Composition, Windows Cloud Infrastructure, Windows Management, Windows Authentication, Windows Fundamentals, Windows Cryptography, Windows Virtualization, and Windows Core Networking.		
Cumulative Update for .NET Framework 3.5 and 4.7.2 for Windows 10, version 1809 and Windows Server, version 2019	This security update addresses a denial of service vulnerability in .NET Framework.	KB4601060	None
2021-KB4601050 Cumulative Update for .NET Framework 3.5 and 4.8 for Windows 10, version 2004, Windows Server, version 2004, Windows 10, version 20H2, and Windows Server, version 20H2	This security update addresses a denial of service vulnerability in .NET Framework.	KB4601050	None
2021-02 Cumulative Update for Windows 10 Version 2004 for x64-based Systems.	Updates to improve security when using input devices such as a mouse, keyboard, or pen. Updates for verifying usernames and passwords.	KB4601319	None
Security intelligence updates for Microsoft Defender Antivirus and other Microsoft antimalware	Microsoft continually updates security intelligence in antimalware products to cover the latest threats and to constantly tweak detection logic, enhancing the ability of Microsoft Defender Antivirus and other Microsoft antimalware solutions to accurately identify threats. This security intelligence works directly with cloud-based protection to deliver fast and powerful AI-enhanced, next-generation protection.	KB2267602	None

<p>Cumulative Update Preview for .NET Framework 3.5 and 4.8 for Windows 10, version 2004, Windows Server, version 2004, Windows 10, version 20H2, and Windows Server, version 20H2</p>	<p>The February 2, 2021 update for Windows 10, version 2004, Windows Server, version 2004, Windows 10, version 20H2, and Windows Server, version 20H2 includes cumulative reliability improvements in .NET Framework 3.5 and 4.8. We recommend that you apply this update as part of your regular maintenance routines.</p>	<p>KB4598299</p>	<p>None</p>
