BD Insyte™ Autoguard™ BC
Shielded IV Catheter with Blood Control Technology
95% reduction in the risk of blood exposure\textsuperscript{1}

You strive for a clean IV placement every time, but when you have to apply pressure while activating the device’s safety mechanism and connecting the extension, blood spills can happen.

The BD Insyte™ Autoguard™ BC Shielded IV Catheter with Blood Control Technology addresses these challenges:

- No need to apply venous compression during insertion
- Minimize blood exposure, cleanup time and use of supplies associated with blood spills
- Needlestick injury protection
- Designed to improve first-stick success and reduce painful hit-and-miss insertions

Built-in blood leakage prevention

In a healthy human study, 98% of clinicians indicated they felt no risk of blood exposure during an insertion when using BD Insyte™ Autoguard™ BC Catheters.\textsuperscript{1}

Stop blood leakage without the need for venous compression—the unique design allows a one-handed insertion technique with blood flow resuming when an add-on device is connected.

Clinically demonstrated to reduce the risk of blood exposure by 95%\textsuperscript{1}—reducing staff exposure to blood and surface contamination.*

In a clinical study, 98% of clinicians stated they felt no risk of blood exposure during insertion when using BD Insyte™ Autoguard™ BC Catheters.\textsuperscript{1}

Blood control technology minimizes blood exposure,* cleanup time and use of supplies associated with blood spills.\textsuperscript{2}
Safety at the push of a button

The BD Insyte™ Autoguard™ BC Catheter is tailored for the clinician’s safety and insertion success, leaving you feeling confident in each insertion.

Demonstrated to reduce needlestick injuries by 95%†,3

- Push-button needle shielding technology
- Fully encapsulated needle

The right IV catheters, right from the start

**BD Vialon™ Biomaterial**

The catheter material is designed to resist kinking and softens up to 70% in the vein, enabling longer dwell times and reducing the chance of mechanical phlebitis by up to 50%.‡,4

**BD Instaflash™ Needle Technology**

Incorporates a notched needle (20- to 24-gauge), which may improve first-stick success and reduce painful hit-and-miss insertions.
Worry less about blood exposure, spills and cleanup with BD Insyte™ Autoguard™ BC Catheters*<sup>1</sup>

Consult product insert for complete instructions, warnings and cautions.
