Elevate the point-of-care experience for patients and staff

- Easy-to-read display, featuring 1-button functionality and minimal hands-on time to meet your staff’s demands
- Flexible workflow options to adapt to your workplace needs
- Timely, accurate results (<11 minutes for Flu A+B and RSV; <6 minutes for Group A Strep), minimizing wait times
- BD Veritor™ Plus eLearning platform that simplifies staff training and system implementation
- Improved quality control and traceability enabled by the optional BD Veritor™ InfoScan module

Taking the point-of-care experience to the next level

At BD, we understand that point-of-care testing presents challenges:

• Complex, highly manual workflows
• Lengthy time to results and delays in diagnosis
• Manual documentation, potentially leading to transcription errors
• Inadequate training programs or reference materials
• Difficulties in checking training compliance or assessing staff competency

The BD Veritor™ Plus Analyzer is a portable and easy-to-use instrument that enables you to overcome challenges to providing streamlined point-of-care testing.

- Offers flexible and adaptable workflow options, allowing you to maximize staff efficiency
- Delivers timely results—less than 11 minutes for Flu A+B and RSV and less than 6 minutes for Group A Strep
- Minimizes manual transcription by allowing data storage/download via USB port
- Includes the interactive BD eLearning platform, providing a comprehensive online training curriculum
  • Automatically updated with the latest versions of resources and references
  • Allows you to review training compliance and manage certificates of program completion
The BD Veritor™ Plus System, together with the BD eLearning online training platform, offers you the ability to:

- Optimize training
- Provide ease of use
- Deliver accurate, timely results
- Provide workflow flexibility
- Streamline sample processing

**Optimize training**

The BD eLearning platform provides a comprehensive training experience with:

- Interactive, step-by-step training modules
- Dashboards and reports for easy management of training compliance and completion

**Provide ease of use**

The BD Veritor™ Plus System simplifies operation by offering:

- CLIA waived tests, allowing novice and nonlab personnel to confidently help with the diagnosis of Flu A+B, Group A Strep and RSV
- An intuitive 1-button functionality, minimizing training time
- A digital display, for easy-to-read results

**Deliver accurate, timely results**

Proven performance vs reference methods for Flu A+B, Group A Strep and RSV:

<table>
<thead>
<tr>
<th></th>
<th>PPA</th>
<th>NPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Influenza A (vs PCR)</td>
<td>83.6% (76.1%, 89.1%)</td>
<td>97.5% (95.7%, 98.5%)</td>
</tr>
<tr>
<td>Influenza B (vs PCR)</td>
<td>81.3% (71.1%, 88.5%)</td>
<td>98.2% (95.7%, 99.3%)</td>
</tr>
</tbody>
</table>

**Provide workflow flexibility**

Select the mode to fit your workflow:

- To keep up with high test demand by batching, use **Analyze Now** mode
  - Incubate specimen for time required for each assay, then insert test device into Analyzer, result is displayed within seconds
- To accomplish other tasks while running tests, use **Walk Away** mode
  - Add specimen to test device and insert into Analyzer for automatic incubation and analysis

**Streamline sample processing**

Easy processing uses prefilled, unitized tubes color-coded by reagent, reducing potential errors.

To process the sample:

1. Insert sample swab into tube
2. Mix sample with reagent
3. Dispense sample into test device
4. Insert test device into Analyzer:
   - For Walk Away mode, insert immediately
   - For Analyze Now mode, insert after processing sample

**Proven performance vs reference methods for Flu A+B,1,2 Group A Strep3 and RSV3**

<table>

1. Insert sample swab into tube
2. Mix sample with reagent
3. Dispense sample into test device
4. Insert test device into Analyzer:
   - For Walk Away mode, insert immediately
   - For Analyze Now mode, insert after processing sample

**Influenza A** vs PCR

- Sensitivity: 83.6% (76.1%, 89.1%)
- Specificity: 97.5% (95.7%, 98.5%)

**Influenza B** vs PCR

- Sensitivity: 81.3% (71.1%, 88.5%)
- Specificity: 98.2% (95.7%, 99.3%)

**Group A Strep** vs culture

- Sensitivity: 95.4% (95% Cl: 90.3%, 97.9%)
- Specificity: 95.7% (95% Cl: 93.7%, 97.1%)
Personalized solutions for training and quality control

The BD eLearning platform offers simplified, personalized training online, allowing staff to quickly become proficient with the BD Veritor™ Plus System for smoother implementation.

All-encompassing training modules for all available assays (Flu A+B, Group A Strep and RSV)
• Includes introduction to the BD Veritor™ Plus system
• Each 5-minute module follows the same structure:
  1. Introduction to the disease state
  2. Sample collection and preparation
  3. Running the assay on the BD Veritor™ Plus system
  4. Interpretation of results
  5. Competency assessment

Delivers a personalized, dynamic learning experience
• Allows the assignment of training plans by role, product or learning type
• Facilitates learning with interactive videos, featuring step-by-step instructions and concrete examples, available on any device, any place, any time

Helps to track training compliance
• Helps ensure training compliance with easy-to-use reporting and dashboard tools
• Allows convenient management of certificates of program completion

Provides a complete library of resources and references
Updated with the latest FDA-cleared versions of:
- User manuals
- Package inserts
- Sample collection charts
- Quick reference cards

The BD Veritor™ InfoScan module facilitates reliable quality control
Scanning capabilities facilitate traceability and may reduce hands-on time, transcription errors and paperwork

Automated documentation functionality includes:
• Operator ID
• Specimen ID
• Kit Lot information
Barcode scanner can read the full 128 ASCII character set, including all US keyboard characters
• Data can be stored locally or downloaded via USB cable for improved traceability (USB cable included)
• Results can be printed

InfoScan module
Elevate the point-of-care experience for patients and staff

- Easy-to-read display, featuring 1-button functionality and minimal hands-on time to meet your staff’s demands
- Flexible workflow options to adapt to your workplace needs
- Timely, accurate results (<11 minutes for Flu A+B and RSV; <6 minutes for Group A Strep), minimizing wait times
- BD Veritor™ Plus eLearning platform that simplifies staff training and system implementation
- Improved quality control and traceability enabled by the optional BD Veritor™ InfoScan module

Elevate the power of simplicity

The BD Veritor™ System enhances POC testing for CLIA-waived Flu A+B, Group A Strep and RSV* assays

Discover real progress in point-of-care testing with the BD Veritor™ Plus system. Combine accurate results with ease of implementation and simplified workflow options.
