Hear what customers are saying about the BD Vacutainer® UltraTouch™ Push Button Blood Collection Set

"Some patients don't even realize they've had their blood drawn, the poke is so much less painful for them. Nurses are happy they can reduce pain for their patients."

–Jennifer Rettmann, Infection Prevention, Beaver Dam Community Hospital

“We have a high elderly population at our facility, and it has increased our ability to cut down multiple sticks and increase patient comfort.”

–Angelique Chadish, Phlebotomist, Ohio Valley General Hospital

“The patients have noticed the use of the 25 G. They appreciate the option and the fact that we are getting blood with one stick now.”

–Toni Rogen, Laboratory Manager, Hematology-Oncology Associates of Central New York

Phlebotomy is critical to care

Often one of the patient’s 1st procedures during a hospital visit

70% of all clinical decisions are made based on information from lab test results¹

8/10 For 8 out of 10 patients, it influences their overall satisfaction²

Decisions need to be made...

Straight needle? Wingset?

23 G 21 G 25 G
Difficult venous access (DVA) is a common challenge—can technology help?

- 56% of blood collections are from patients with a diagnosis associated with DVA.
- 94% of nurses state that using a small-gauge needle assists them with accessing veins on otherwise difficult patients.
- Yet hemolysis risk and tube-fill time prevent routine use of 25 G.
- 91% of nurses would prefer a 25 G blood collection device that eliminates the increased risk of hemolysis and slower fill times associated with traditional blood collection devices.

Healthcare practitioners like you have asked for innovations that would allow selection of the right product without concern for the traditional negative trade-offs.

The Clinical Laboratory Standards Institute (CLSI) historically states to avoid the use of 25 G needles.

...with so much to consider
**BD RightGauge™ Technology**

No increase in hemolysis compared to 23 G traditional wingset.

**Average hemolysis index**

Avg. hemolysis index

**Tube fill times**

5-mL tube fill time (seconds)

- **23 G** BD Vacutainer® UltraTouch™ Blood Collection Set
- **25 G** BD Vacutainer® Push Button Blood Collection Set

No compromise in tube fill times.

- **23 G** BD Vacutainer® UltraTouch™ Blood Collection Set
- **25 G** BD Vacutainer® Push Button Blood Collection Set

**BD PentaPoint™ Technology**

32% reduction in penetration force.

- **3-bevel vs 5-bevel**
- Penetration force (in grams)

- **23 G** 3-bevel traditional wingset: 26.7
- **23 G** BD Vacutainer® Push Button Blood Collection Set: 25.1

47% decrease in overall pain during blood collection.

- **25 G** BD UltraTouch™ Blood Collection Set

**BD® Push Button Technology**

- Single-handed, in-vein safety activation
- Delivers split-second protection
  - Reduces needlestick injuries by up to 88%
- “Click” confirms complete safety activation

**Average overall pain scores**

- **25 G** UT-PBBCS vs 23 G competitive wingset
  - P = 0.037  Pain score (0-10)

- **23 G** BD Vacutainer® Push Button Blood Collection Set: 1.7
- **25 G** BD Vacutainer® UltraTouch™ Blood Collection Set: 0.9
