

## Clinical

### Easy Access

Touch-to-Take technology provides easy access to needed supplies.

### Increased Security

Pyxis® BioID fingerprint identification system ensures secured access via fingerprint verification.

### Warning Prompts

Audible warnings, product specific danger codes and expiration date support, improve patient safety.

## Operational

### Flexibility

Adaptable and extendable solution that is adjustable to the needs of treatment areas.

### Detailed Reporting

Extensive reports provide immediate inventory activity and system information, enabling just in time decision making.

### Workflow Optimisation

Through automation, time spent on inventory management is reduced.

### Stock Accuracy

Low or out of stock incidents are minimised.

## Financial

### Cost Capture

Supply use information at the patient level provides cost tracking and enables reimbursement by DRG.

### Standardisation

Point of use data helps maintain and standardise supplies.

### Data

Data trend analysis and reporting enable organisations to optimise stock information and workflows.

# Pyxis SupplyStation®

Automated point-of-use supply management system

CareFusion's Pyxis® products improve operational efficiency and help drive down health care costs through automated supply management.

The Pyxis® JItrBUD (Just-In-Time remote Business Utilisation Device) wireless Touch-to-Take button pad attaches to existing shelving or other storage devices.

Pyxis SupplyStation® system offers a dual solution. The secured Pyxis SupplyStation® system is extended with the use of Pyxis® JItrBUD, which encompasses all items, even the bulkiest or the inexpensive ones throughout the ward storage area.

## Benefits

### Reduced supply costs

Extensive reporting capabilities help hospitals evaluate supply use by care site to better decrease costs & spending.

### Optimised stock

Dynamic Order Point identifies user trends and optimises stock levels to return overstocked supplies. This drives standardisation and controls stock utilisation. As your stock needs change, this flexible system adapts accordingly.

### Increased patient care time

Clinicians no longer spend critical patient care time locating, ordering and restocking supplies.

### Extended supply automation

Pyxis® JItrBUD adapts to existing hospital storage solutions. It extends supply automation and patient charging to virtually any area of the hospital with all types of supplies.

### Complete tracking system

With hands-free selection of supply items, the Pyxis® JItrBUD delivers complete automation tracking system from the point of order to the point of use.

### Reduced cost & increased standardisation

Pyxis® JItrBUD helps reduce supply utilisation costs and allows for additional opportunities for supply standardisation.
