Diamond-Flex® technology allows instrumentation to articulate in the peritoneal space for retraction of organs and structures.

This exclusive line of reusable instruments helps meet the need of unique surgical challenges by enabling the surgeon to insert the instrument straight through a 5.5mm cannula and then activate one of many predetermined shapes. To activate, articulate the tip of the instrument into shape by turning the actuating knob on the handle until the complete shape is formed.
Diamond-Flex® re retractors have a flush port system to aid in cleaning and sterilization. In addition, the Diamond-Flex® retractor is accompanied by a metal sterilization sleeve used to keep the distal end straight during sterilization and cleaning.

To place an order or for more information, please call your V. Mueller® and Snowden-Pencer® sales representative, call 800.323.9088 or visit carefusion.com/snowdenpencer.

Snowden-Pencer® warranty
Diamond-Flex® retractors feature a one-year service warranty, which covers the most common repairs laparoscopic instruments require, and a life-time warranty against defects in materials and workmanship. Any product that proves to be defective in materials and workmanship will be repaired or replaced at our discretion. This guarantee (warranty) does not cover damage caused by abuse or misuse and is voided if anyone other than Snowden-Pencer® personnel repair or modify the instrument.
